Medisoft Network Providers Must Update Windows

2018-05-12 - Medical Billing Professionals - Comments (0) - General

Medisoft Network Providers Must Update Windows Now

With the latest Windows update release, all providers must update Windows now in order to be able to connect to the network.

If you had problems connecting this past week and disabled automatic downloads and installs of Windows updates, please re-enable automatic downloads and installs. Then have your computer check for the latest Windows updates, install the updates and reboot

Thanks,
Steve
