New and Deleted ICD 10 Codes for Chiropractors as of October 1, 2016

2016-09-25 - Medical Billing Professionals - Comments (0) - General

On October 1, 2016, there will be changes to ICD 10 codes with over 300 ICD 10 codes deleted and new, more specific ICD 10 codes added.

To help our chiropractic clients, we have added a PDF to the **Downloads** section of the Support Suite summarizing the new codes and the deleted codes.

[Click here](#) to see the PDF in the Downloads section.

NOTE: the deleted codes will be shown in **red** and the newly added codes will be shown in **blue**.

IT IS YOUR OFFICE'S RESPONSIBILITY TO UPDATE PATIENT ICD 10 CODES WHEN SUBMITTING BILLING TO ENSURE YOU ARE USING ACCURATE ICD 10 CODES. If you use an ICD 10 code that has been deleted as of October 1, 2016, those claims will deny electronically.

Thanks,

Steve
