Survey Regarding Web Based EHRs

This email is for our chiropractic, physical therapy and behavioral health clients. **WE ARE ASKING ALL OF OUR CLIENTS IN THESE SPECIALTIES TO READ THE BELOW EMAIL AND REPLY BACK TO US ADVISING IF YOU MAY OR MAY NOT BE INTERESTED IF WE OFFERED SUCH AN INTEGRATED EHR SYSTEM.**

AND NOTE: THAT IF WE DO OFFER INTEGRATED SYSTEMS WITH ANY OF THE BELOW EHRS, YOU WILL BE ELIGIBLE FOR OUR EMR REWARDS PROGRAM IN WHICH YOU WILL SAVE 10% EACH MONTH ON YOUR INVOICE WITH US...in some cases enough to pay for the cost of the EHR!!

More and more practices are interested in an integrated system where the practice can have an EHR and also integrate with a Practice Management System.

Most of the time the Practice Management Systems that EHRs offer lack many important features that we find important in our Medisoft.

However, we are looking at 3 possible integrated programs to offer our clients that offer many important features for possible integration: WebPT (for physical therapists), Chiro Fusion (for chiropractors) and either TherapyNotes for behavioral health providers.

The way it would work with each system is simple.

- We would enter all patient demographics in the EHR, including setting up all payers and procedure codes.
- The provider would chart the patient in the EHR and select the appropriate CPT codes and ICD10 codes.
- Each day we would log into the EHR, scrub the claims, correct them for any errors (such as missing modifiers or incorrect CPT codes listed for payers) and then submit the claims.
- We would post all payments in the EHR, including copays and insurance payments
- You would be able to see in the EHR all payments, see patient balances in real time and be able to run patient statements upon demand
- You would be able to see in each program open claims based upon the payer's aging reports.
- You would have to be enrolled for our PremiumPlus Service for the above

Although the Medisoft software we offer is better than the Practice Management Systems offered by any of these EHRs, they all do offer quality programs.

AGAIN, TO HELP US GAUGE THE INTEREST OF INTEGRATED SYSTEMS, PLEASE SIMPLY EMAIL US AND ADVISE IF YOU MAY OR MAY NOT BE INTERESTED IN WE OFFERED SUCH AN INTEGRATED SYSTEM. Note: If you say yes, you are not obligated to use the new system if offered.

And if you have any questions about any of the EHRs, don't hesitate to ask.

Thanks,
Steve
